

### Shock Granules

Concentrated chlorine granules for shock dosing swimming pool water to kill bacteria and breakdown organic contaminants.

#### Treatment

Test the water with a suitable test kit to determine the chlorine levels. A weekly shock dose is recommended to remove algae and bacteria, and prevent any build up of resistant strains. To increase the chlorine level by 1mg/litre (ppm), add 150g Shock Granules per 100m<sup>3</sup>. Add Shock Granules to raise the chlorine level to between 6-10mg/litre (ppm)

#### Application

Dissolve the Shock Granules in water in a plastic bucket. Add solution to the pool water near return inlets

#### Storage & Handling

Store in a cool, dry place. Contact with combustible materials may cause fire. Do not mix with other chemicals. Always wear suitable gloves and eye protection when handling.

#### Warning

This container must not be used for or contaminated with any other materials.

### Shock Granules

Calcium Hypochlorite.

EC LABEL EC No. 231-908-7.

UN : 2880

OXIDIZING

CORROSIVE

DANGEROUS FOR  
THE ENVIRONMENT

**Causes burns. Harmful if swallowed. Contact with combustible material may cause fire. Contact with acids liberates toxic gas. Very toxic to aquatic organisms.**

Keep locked up and out of the reach of children. In case of contact with eyes, rinse immediately with plenty of water & seek medical advice. In case of accident or if you feel unwell, seek medical advice immediately (show label where possible). Wear suitable protective clothing, gloves and eye face protection. Do not empty into drains, dispose of this material and its container to hazardous or special waste collection point. Avoid release to the environment. Refer to special instructions / safety data sheet. **Warning! Do not use together with other products. May release dangerous gasses (chlorine).**
