

Stabilised Chlorine Granules Rapid

dissolving Chlorine Granules, for the easy disinfection of swimming pool water. The granules have little effect on pH value and are stabilised against chlorine loss due to sunlight. Use for daily chlorination.

Treatment To increase chlorine level by 1mg/litre (ppm). Add 180g chlorine granules per 100m³ pool water. Use a test kit to test the free chlorine level regularly. Maintain the free chlorine level at 1.0 - 2.0mg/litre (ppm).

Check pH level is pH 7.2 to pH 7.8 for maximum efficiency

Application Add Chlorine Granules into circulating water near return inlets. In non circulating water, pre-dissolve granules in 10 litres of water and add to pool water slowly and evenly.

Storage & Handling Store in a cool, dry place away from oxidizing and reducing agents, strong acid, alkalis, solvents and organic materials. Do not mix with other chemicals. Always wear suitable gloves and eye protection when handling.

Warning This container must not be used for or contaminated with other materials.

Stabilised Chlorine Granules

Troclosene Sodium, dihydrate. Sodium Dichloisocyanurate, dihydrate. EC No. 220- 767-7. UN : 3077

HARMFUL

DANGEROUS FOR
THE ENVIRONMENT

Harmful if swallowed. Contact with acid liberates toxic gas. Irritating to eyes and respiratory system.

Very toxic to aquatic organisms, may cause long term adverse effects in the aquatic environment.

Keep out of the reach of children. Keep container dry. Do not empty into drains. In case of contact with eyes, rinse immediately with plenty of water & seek medical advice.

In case of fire and/or explosion do not breathe fumes. This material and its container must be disposed of as hazardous waste. Avoid release to the environment. Refer to special instructions/safety data sheets. Do not use together with other products. May release dangerous gases (chlorine).
